

STATEMENT OF POLICY REGARDING CUSTOMER PROPRIETARY NETWORK INFORMATION

Set forth below is a statement summarizing the policies and procedures of Internap Connectivity, LLC ("Internap Connectivity") which ensure adequate compliance with the Federal Communications Commission's ("FCC") CPNI regulations. See 47 C.F.R. § 64.2001 et seq. Internap Connectivity provides broadband services exclusively.

As a broadband provider, the company does not provide "telecommunications services" and therefore does not have access to CPNI. Internap Connectivity does not have information concerning the quantity, technical configuration, type, destination, location, or amount of use of telecommunications services which can be associated with individual customers.

Internap Connectivity does not release or distribute CPNI to unauthorized individuals; neither does the company use CPNI in violation of Section 64.2001 § et seq. of the FCC's Rules.

Internap Connectivity does not maintain CPNI in any manner that would give rise to the unauthorized disclosure of confidential information. Even in cases dealing with the limited information that is necessary to facilitate customer purchases broadband services, Internap Connectivity takes steps prior to providing any requested information to assure itself that the individual making the request is authorized to obtain it.

Internap Connectivity did not have any breach of its customer records during the past year, nor has the company received any customer complaints in the past year concerning the unauthorized release of or access to CPNI. Because Internap Connectivity does not provide telecommunication services, and does not know the identity of end-users whose traffic is routed through Internap Connectivity, it cannot notify any end-user customers directly if a breach occurs. However, Internap Connectivity has processes and procedures in place to maintain records of any security breaches and to notify affected carriers and law enforcement of such breaches. Finally, the company has no information, other than publicly reported information regarding the processes that pretexters or data brokers are using to attempt to access CPNI.
